

PRESIDENT

Gokulakrishnan Ravikumar

I am currently pursuing my Masters in Engineering in the Industrial Engineering stream before my graduate studies I worked as a Production & Planning engineer and as a Team Lead for years and also during my undergraduate days I undertook many events by organizing and coordinating between the students and staffs. I have been actively volunteering a lot of events in the University of Regina Student Ambassador program and also the off-campus events I am the current President of the Engineering Graduate Students Association and the Graduate Student Safety Council Representative

The following agendas that I am currently working on are:

- Reducing the Coop credits from 6 to 3 to save a huge sum of tuition fees towards Coop semester
- Insisting the Engineering department to allow a new program route that is course-based which can make any student complete the degree without working on any thesis or project
- Adding new courses to the departments which are in lack of course
- Increasing the lab space from 2 to 5 members by following the Covid-19 safety protocols so time conflict between the students can be reduced
- Insisting the board to cut off the International surcharges for the students who are under maintenance

I can assure you that I will do my best to meet the university & students welfare needs and requirements and to improve the GSA standards compared to top-notch universities.

VICE PRESIDENT - EXTERNAL RELATIONS

Jessica Lewgood

I am a Doctoral Student in the Faculty of Kinesiology and Health Studies. I grew up in Regina and completed both my Bachelor's Degree in Kinesiology and Health Studies and Masters of Science in Kinesiology at the University of Regina. I have sat on different local committees and boards for Parkinson Canada, the Arthritis Society of Canada, and the Kinesiology Students Association as an undergraduate student. As Vice President of External Affairs, I would continue to build on the connection between the Graduate Students and the Graduate Students Association through promotion of activities via our online platforms. Due to the global pandemic many of us are conducting our studies off-site and my goal would be to engage with the Graduate Student body through social media, emails, and our committee members from each Faculty. Then in our transition to being back on campus reintegrate campaigns of interest of the graduate students, while providing a strong voice and involvement at the local, provincial, national, or international levels.

VICE PRESIDENT – STUDENT LIFE

Jayveer Chavda

I am currently pursuing my Masters of Applied Science in Process System Engineering at University of Regina. I did my bachelors in Chemical Engineering from Amity University, India. I have done research on wastewater treatment. I have been elected as an Executive of Council in URSU from Faculty of Engineering and Applied Science where I advocate students for various issues which would relate to the tuition fees and courses. I have also been a member for student association in student affairs during my undergraduate where I took the role of the student advocate helping them with the technical and non-technical matter and taking initiatives. I have volunteered for various activities on campus and off campus. I believe my experience would bring the best for the VP Student Life and actively take part in betterment of the GSA.

COUNCIL COMMITTEE - KENNETH LEVENE GRADUATE SCHOOL OF BUSINESS

Muhammad Adnan Shaikh

Hi, I am Shaikh Muhammad, and this is my second year at the University of Regina. Currently, I am taking courses in the Human Resource Management Program (master's degree) and enjoying learning HR Acquisition Talent. Although I do possess a post-graduate degree (MBA) but to improve and strengthen my strategic decision-making skills, I have decided to enroll in this program.

Being a student, I understand empathically, the issues that students face during their study tenure. Thus, I have decided to take an initiative for being a part of Council Community member at the university that would benefit the students. Therefore, I am running for the position of Council Committee for Kenneth Levene Graduate School of Business. Just for your acknowledgment that I do have 8 years of practical hands-on experience in handling critical and catastrophic issues as I held a project management position in the past.

I do promise faithfully to invest all my energy and capability to achieve student goals and harvest a systematical path to hit the vision competently. Moreover, I would passionately like to advocate for your voice and would enjoy having the opportunity to talk with you further to discuss the requirements and expectations of students.

Your Voice matters and I understand the value. Together let us make it.

Vote Shaikh!
